

Plant-Based Curriculum

This exciting new curriculum connects students with the magical world of plants and how they work. This curricula is a comprehensive exploration of plants and their needs and includes interactive classroom videos, teacher resources, an on-site workbook, pre- and post-field trip lessons, and an assessment. Teachers are welcome to use this curriculum independent of a field trip to the U.S. Botanic Garden. However, if considering enhancing the lesson with a field trip, please submit the field trip requestion form. See also: [Tips for field trips](#).
